COMPANY PROFILE

WELCOME TO OUR COMPANY

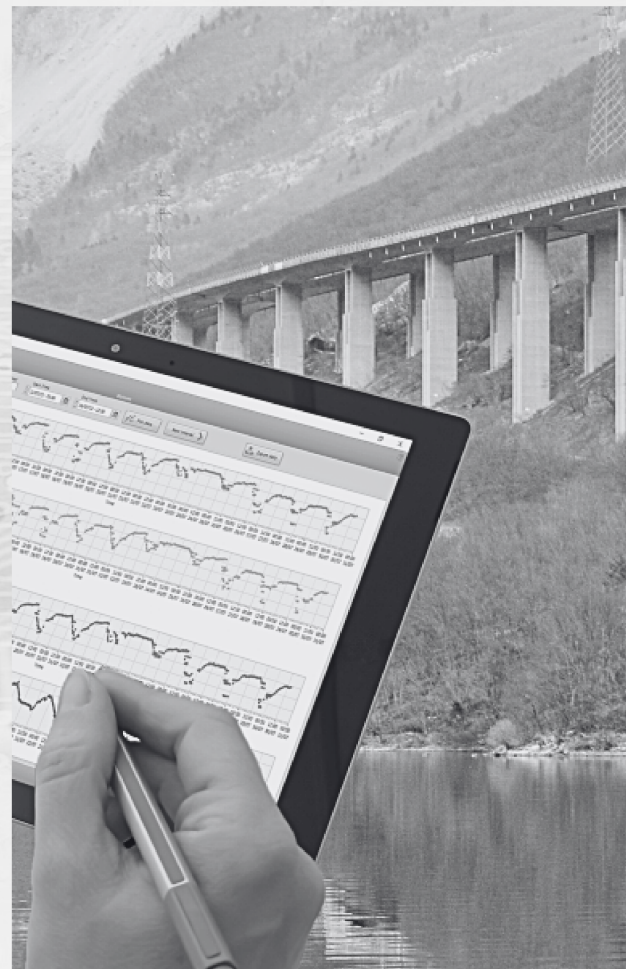

S2X is a leading Company for technology innovation in civil engineering and for structural safety!
We are glad to introduce you our commitment to deliver high-quality products and services and our professional environment and teamworking philosophy,

In these 12 pages you can explore the skills and the technical features of the Company and the professionals which we are looking for to join the team.

WHAT DO YOU KNOW ABOUT OUR COMPANY?

S2X is an innovative SME born as a spin-off of the University of Molise. It is active in the development and supply of hardware and software solutions for dynamics testing and monitoring of civil structures. The Company offers specialized products and services with a high technological content which are the result of over 15 years of research and development activities in the academic as well as industrial field.

COMPANY STATEMENT

Our Mission

Developing innovative civil SHM technologies so that the structures can self diagnose their faults or damage and support proactive maintenance.

Our Vision

Making civil structures smart and the world a safer place to live in.

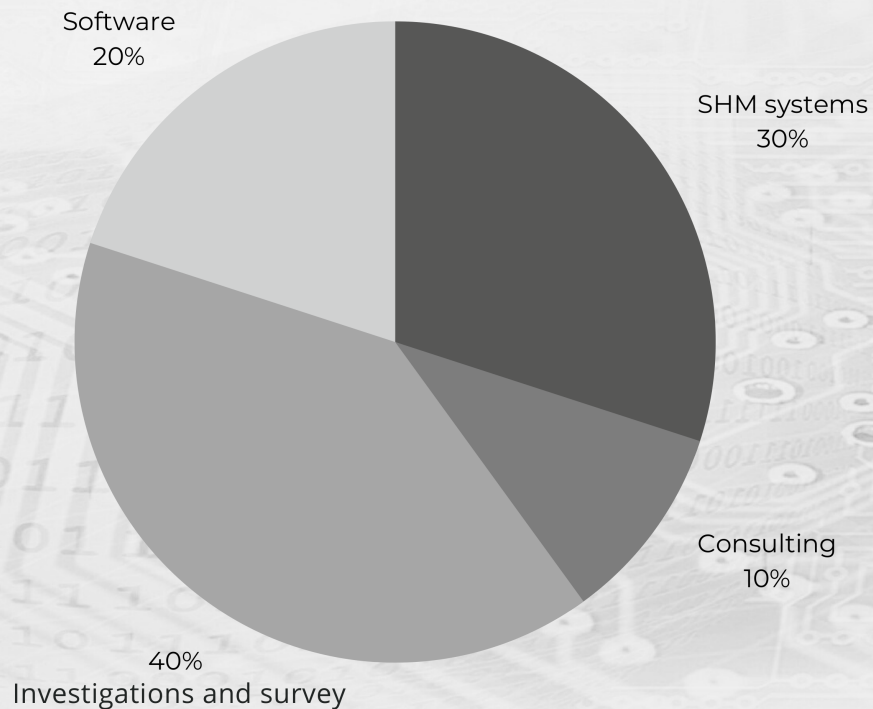

Our Team

Our qualified team of engineers has more than 10 years of experience in SHM and structural engineering.

Some of our customers
